DETAILED ACTION

Applicant's election of Group I in the reply filed on 7/3/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Amended claims 1-14, 16-17 and new claims 18-21 are pending in the present application. Claims 7-14 and 16 were withdrawn. In light of the claim amendment filed on 7/3/08, the following species restriction is required.

Species Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) osteoporosis is induced in the bone system model; (b) osteomalacia has been induced in the bone system model; (c) rheumatoid arthritis has been induced in the bone system model; and (d) at least one specifically recited bacterial or viral strain has been introduced into the bone marrow system.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

All of the above species for a bone system model comprising a mineralized matrix, a layer of osteoblasts at confluence and/or osteoblast nodules on the mineralized matrix, and osteoclasts on said layer or/or said nodules.

The following claim(s) are generic: at least claims 1-6 and 17.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Each of the above **listed species of a bone system model** is different structurally, chemically and has different properties one from the others (e.g., a bone system model for osteoporosis vs a bone model system for osteomalacia vs a bone system model for rheumatoid arthritis vs a bone model system for infection by a particular recited bacterial or viral strain). Each different structure can be considered to be a "special technical feature"; and therefore the listed species lack the same or corresponding special technical features.

Application/Control Number: 10/559,819

Art Unit: 1633

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang Nguyen, Ph.D., whose telephone number is (571) 272-0776.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's SPE, Joseph T. Woitach, Ph.D., may be reached at (571) 272-0739.

To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1633; Central Fax No. (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
